Art Unit: 1722

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-6, drawn to a method of making an optical component, classified in class 264, subclass 1.25.

II. Claims 7-12, drawn to an apparatus for making an optical component, classified in class 249, subclass 83.

2. The inventions are distinct, each from the other because of the following reasons: Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed could be used to practice another and materially different process such as a process wherein the carrier is not aligned in relation to the mold with at least one positioning means, but rather simply inserted into the mold.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 1722

their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Salvatore Anastasi on June 20, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
